

# Urine-diverting toilets by TROBOLO®

[www.trobo.com](http://www.trobo.com)

## Comfortable toilet use everywhere

Urine-diverting toilets by TROBOLO® allow you to use your toilet comfortably and hygienically no matter where you are. Simple, self-sufficient and sustainable. That is TROBOLO®. A clean solution.

# This is what a urine-diverting toilet by TROBOLO® offers

## No need to compromise

TROBOLO® enables access to hygienic and comfortable toilet systems that satisfy the highest standards – even in locations where this seems impossible.

With our TROBOLO® urine-diverting toilets, we managed to develop an autonomous and sustainable solution for your daily basic needs which does not require you to do without your usual comforts.

## Autonomous usage

No water or sewer connection available? No problem. Urine-diverting toilets from TROBOLO® are autonomous and hygienic.

## No odours

The TROBOLO® separation system reduces odours and in combination with litter or an exhaust system manages to completely eradicate all smells.

## 100% sustainable

The complete absence of chemicals and water allows for a straight-forward disposal and protects the environment.

## Easy emptying

Thanks to the TROBOLO® separation system, the emptying is easy, hygienic and can be done within a few steps.

# The right solution for every location

TROBLO® urine-diverting toilets can be used in many different ways. We have the right model for every area of application. Our competent customer support team will be happy to advise you without obligation.

## Independence for your house & Tiny House

A TROBLO® urine-diverting toilet allows you to enjoy complete independence in your house or tiny house. Instead of water or environmentally harmful chemicals, only natural litter or alternatively an energy-saving exhaust air system is used.

## The alternative for your garden

Our models for garden and allotment owners do not require water, electricity or chemicals. Thus, they are not only environmentally friendly, but also self-sufficient and can be used without any connections to the electricity grid or the sewage system.

## The solution for your campers & vans

Even on the go our urine-diverting toilets can be used like conventional toilets and are just as comfortable and hygienic. Thanks to chemical-free operation, FSC®-certified wood and handcrafted production, we offer you a fully sustainable solution.

## Perfectly suitable for institutions

A TROBOLO® is excellently suited for use in institutions and can be operated self-sufficiently without electricity and water. Especially in the educational sector, our products have already convinced numerous young and old users alike.

# TROBOLO® IndiBløem

item number: K1XX1372

Mobile urine-diverting toilet with litter for use in minivans, mobile homes and the outdoors.

- Extremely compact therefore especially suitable for minivans and motorhomes
- Low weight and convenient carrying handles
- Immediately ready for operation, no assembly required
- Tight and safe thanks to integrated spill stop
- Low odour due to litter and separation system
- Easy and hygienic emptying
- Self-sufficient without water and chemicals
- Requires neither power nor other connections
- Ideally suited for indoor use

## Features

### Hygienic usage

A TROBOLO® is used in the same way as a WC. The separation system is contactless, so that physical contact occurs exclusively at the toilet seat. Since the excreta only come into contact with plastic surfaces, cleaning is also hygienic.

### No electricity supply

Due to the complete absence of electricity, this TROBOLO® does not require a power connection. The urine-diverting toilet is completely autonomous.

### Easy emptying

Thanks to the TROBOLO® separation system, removal of the internal containers is done in a few simple steps without coming into contact with the excreta and is therefore easy and hygienic.

### Litter

In order to absorb remaining odours and moisture, around 250 ml of litter is scattered over solid excreta and used toilet paper after each defecation.

## Regular toilet paper

Toilet paper doesn't have to be disposed of separately but is dropped through the toilet opening as usual. The use of special toilet paper is not required for this.

## Material

The TROBOLLO® IndiBløem is made of high-quality FSC®-certified 12mm alder plywood, a material which is extremely robust and stable despite its low weight. The separation system is made of durable plastic and is surface sealed.

## Hand-crafted

Every single TROBOLLO® is handcrafted with great attention to detail. The handmade toilet seat, which is given with a hygienic multi-coat lacquer finish, also ensures particularly comfortable seating.

## No chemicals

Due to the TROBOLLO® separation system, there is no need for chemicals. The human excretions therefore do not turn into hazardous waste which would require a costly disposal that is also damaging to the environment.

## Easy cleaning

The excretions only come into contact with plastic surfaces, making cleaning easy and hygienic. The wooden surfaces are proofed with a natural oil and can be wet cleaned just like the toilet seat, which is sealed with an antibacterial protective coating.

## Mobile use without assembly

Thanks to its light weight and convenient carrying handles, the TROBOLLO® IndiBløem is an ideal mobile companion for your vehicle. No assembly is necessary and the TROBOLLO® IndiBløem is designed in such a way that all excreta can be transported safely and hygienically even while driving.

# Quality & Trust

We at TROBOLO® take the responsibility we have towards our planet seriously. Our claim and the highest premise in the manufacture of our products is to combine the very highest standards of quality and sustainability. All TROBOLO® products are manufactured exclusively by a selected medium-sized craft enterprise within the EU, and are subject to the strictest quality controls.

## Sustainability with TROBOLO®

TROBOLO® is officially FSC®-certified. This means you can be sure that we use 100% timber from sustainable forestry for our products and have committed ourselves to economic, ecological and socially responsible management.

The Forest Stewardship Council® - FSC® for short - is an independent, non-profit NGO founded in Rio de Janeiro in 1993 and now represented in over 80 countries worldwide. The aim of the FSC® is to protect the world's forests and preserve them for future generations.

## Comfort without compromises.

The Challenge was to develop hygienic and comfortable toilet systems that meet the highest demands, even in locations where this seems impossible. With our TROBOLO® urine-diverting toilets, our team has succeeded in developing an autonomous and sustainable solution for your daily basic needs without sacrificing the comfort you're accustomed to.

We look forward to advising you on the subject-contains sanitary technology and to sharing our know-how with you.

## What more could you want?

We have been using this indoor toilet almost daily since the beginning of April 2018 and are very satisfied with it. The system is ingenious and easy to handle. What more could you want! No consumption of water, but free fertilizer, which we, but also our plants in the garden, are happy about. It is a pity that this product did not exist before. We can fully recommend this indoor toilet. Thanks to the developers.

**Uwe A.**

“

## More than satisfied.

We bought the urine-diverting toilet for our garden at the beginning of spring on the recommendation of a friend, so that we don't always have to walk so far. Construction as well as the first emptyings were easy. So far we are more than satisfied and our garden is happy with the organic fertilizer.

**Renate W.**

“

## Thanks for the great idea!

To be honest, I was a little sceptical at first whether it would really work. But what can I say? It's better than I expected. We immediately bought the model with electric exhaust air and there is absolutely no odour whatsoever. It's funny that something like this hasn't been around for a lot longer, because then we wouldn't have had to buy expensive chemicals for the chemical toilet over the years. By the way, we have disposed of that by now... So thanks again for the great idea!

**Annika H.**

“

## A big praise to you.

I have owned a urine-diverting toilet for about 4 months and I am completely satisfied. I use it as an indoor toilet without exhaust air and it works wonderfully, without unpleasant odours. In the beginning I had some doubts, but these were quickly dispelled. A big praise to the manufacturers, great workmanship and quick feedback in case of questions!

**Kerstin P.**
