Urine-diverting toilets by TROBOLO®

www.trobolo.com

Comfortable toilet use everywhere

Urine-diverting toilets by TROBOLO® allow you to use your toilet comfortably and hygienically no matter where you are. Simple, self-sufficient and sustainable. That is TROBOLO®. A clean solution.

This is what a urine-diverting toilet by TROBOLO® offers

No need to compromise

TROBOLO® enables access to hygienic and comfortable toilet systems that satisfy the highest standards – even in locations where this seems impossible.

With our TROBOLO® urine-diverting toilets, we managed to develop an autonomous and sustainable solution for your daily basic needs which does not require you to do without your usual comforts.

Autonomous usage

No water or sewer connection available? No problem. Urine-diverting toilets from TROBOLO® are autonomous and hygienic.

No odours

The TROBOLO® separation system reduces odours and in combination with litter or an exhaust system manages to completely eradicate all smells.

100% sustainable

The complete absence of chemicals and water allows for a straight-forward disposal and protects the environment.

Easy emptying

Thanks to the TROBOLO® separation system, the emptying is easy, hygienic and can be done within a few steps.

The right solution for every location

TROBOLO® urine-diverting toilets can be used in many different ways. We have the right model for every area of application. Our competent customer support team will be happy to advise you without obligation.

Independence for your house & Tiny House

A TROBOLO® urine-diverting toilet allows you to enjoy complete independence in your house or tiny house. Instead of water or environmentally harmful chemicals, only natural litter or alternatively an energy-saving exhaust air system is used.

The alternative for your garden

Our models for garden and allotment owners do not require water, electricity or chemicals. Thus, they are not only environmentally friendly, but also self-sufficient and can be used without any connections to the electricity grid or the sewage system.

The solution for your campers & vans

Even on the go our urine-diverting toilets can be used like conventional toilets and are just as comfortable and hygienic. Thanks to chemical-free operation, FSC®-certified wood and handcrafted production, we offer you a fully sustainable solution.

Perfectly suitable for institutions

A TROBOLO® is excellently suited for use in institutions and can be operated self-sufficiently without electricity and water. Especially in the educational sector, our products have already convinced numerous young and old users alike.

TROBOLO® NinoBloem

item number: C8XX1387

Urine-diverting toilet for children aged 2-6 years as a prefabricated kit for indoor use

- Specifically designed for toddlers
- Practical carrying handles for transport
- Equipped with children's separating insert and integrated splash guard
- Low odour due to litter and separation system
- Easy and hygienic emptying
- Self-sufficient without water or chemicals
- Requires neither electricity nor other connections
- Simple assembly without tools
- Everything for initial start-up included
- Ideally suited for indoor use
- Compatible with our children's toilet stool and spill stop

Features

Hygienic usage

A TROBOLO® is used in the same way as a WC. The separation system is contactless, so that physical contact occurs exclusively at the toilet seat. Since the excreta only come into contact with plastic surfaces, cleaning is also hygienic.

No electricity supply

Due to the complete absence of electricity, this TROBOLO® does not require a power connection. The urine-diverting toilet is completely autonomous.

Easy emptying

Thanks to the TROBOLO® separation system, removal of the internal containers is done in a few simple steps without coming into contact with the excreta and is therefore easy and hygienic.

Litter

In order to absorb remaining odours and moisture, around 250 ml of litter is scattered over solid excreta and used toilet paper after each defecation.

Regular toilet paper

Toilet paper doesn't have to be disposed of separately but is dropped through the toilet opening as usual. The use of special toilet paper is not required for this.

No chemicals

Due to the TROBOLLO® separation system, there is no need for chemicals. The human excretions therefore do not turn into hazardous waste which would require a costly disposal that is also damaging to the environment.

Material

The TROBOLLO® NinoBløem is made of FSC®-certified 15mm alder plywood which makes it particularly stable. The surfaces are untreated so that it can be customised with oil or glaze. The separating system is made of resistant plastic and has a sealed surface.

Easy cleaning

The excretions only come into contact with plastic surfaces, making cleaning easy and hygienic. The wooden surfaces can be proofed with a natural oil and can thereby be cleaned with a damp cloth, just like the plastic toilet seat.

Tool-free assembly

The TROBOLLO® NinoBløem is assembled in simple steps by interlocking the pieces. The setup can be done easily by one person within a few minutes and doesn't require any technical skills. Additional fastening is not required.

For children from 2-6

The TROBOLLO® NinoBløem was specifically designed for our smallest users. Therefore, this model is ideally suited for introducing children to using the toilet and the integrated separating insert prevents them from falling in.

Quality & Trust

We at TROBOLO® take the responsibility we have towards our planet seriously. Our claim and the highest premise in the manufacture of our products is to combine the very highest standards of quality and sustainability. All TROBOLO® products are manufactured exclusively by a selected medium-sized craft enterprise within the EU, and are subject to the strictest quality controls.

Sustainability with TROBOLO®

TROBOLO® is officially FSC®-certified. This means you can be sure that we use 100% timber from sustainable forestry for our products and have committed ourselves to economic, ecological and socially responsible management.

The Forest Stewardship Council® - FSC® for short - is an independent, non-profit NGO founded in Rio de Janeiro in 1993 and now represented in over 80 countries worldwide. The aim of the FSC® is to protect the world's forests and preserve them for future generations.

Comfort without compromises.

The Challenge was to develop hygienic and comfortable toilet systems that meet the highest demands, even in locations where this seems impossible. With our TROBOLO® urine-diverting toilets, our team has succeeded in developing an autonomous and sustainable solution for your daily basic needs without sacrificing the comfort you're accustomed to.

We look forward to advising you on the subject-contains sanitary technology and to sharing our know-how with you.

"excellent"

“

What more could you want?

We have been using this indoor toilet almost daily since the beginning of April 2018 and are very satisfied with it. The system is ingenious and easy to handle. What more could you want! No consumption of water, but free fertilizer, which we, but also our plants in the garden, are happy about. It is a pity that this product did not exist before. We can fully recommend this indoor toilet. Thanks to the developers.

Uwe A.

“

More than satisfied.

We bought the urine-diverting toilet for our garden at the beginning of spring on the recommendation of a friend, so that we don't always have to walk so far. Construction as well as the first emptyings were easy. So far we are more than satisfied and our garden is happy with the organic fertilizer.

Renate W.

“

Thanks for the great idea!

To be honest, I was a little sceptical at first whether it would really work. But what can I say? It's better than I expected. We immediately bought the model with electric exhaust air and there is absolutely no odour whatsoever. It's funny that something like this hasn't been around for a lot longer, because then we wouldn't have had to buy expensive chemicals for the chemical toilet over the years. By the way, we have disposed of that by now... So thanks again for the great idea!

Annika H.

“

A big praise to you.

I have owned a urine-diverting toilet for about 4 months and I am completely satisfied. I use it as an indoor toilet without exhaust air and it works wonderfully, without unpleasant odours. In the beginning I had some doubts, but these were quickly dispelled. A big praise to the manufacturers, great workmanship and quick feedback in case of questions!

Kerstin P.
