

TROBOLO® Press Kit

Diverting towards change

We aim to guarantee a sustainable, environmentally friendly and affordable toilet solution for everyone. By offering our TROBOLO® urine-diverting toilets we would like to make this water-saving and odourless way of going to the toilet available to as many people as possible around the world. On top of that, we place particular emphasis on maintaining high quality standards and meeting the expectations of our customers in terms of comfort.

This is our TROBOLO®

Using a TROBOLO® urine-diverting toilet while travelling saves you the hassle of searching for the nearest toilet. Your TROBOLO® is always with you and ensures odourless and sustainable disposal thanks to its separation of solids and liquids when using the toilet. Whether in a mobile home, garden shed, backyard garden or on a houseboat – a TROBOLO® provides absolute autonomy and works even without water or electricity.

The brain behind TROBOLO®

Our company founder Friedrich Lange knows the challenge of disposing of toilet waste in an environmentally friendly way from his own experience. For years, he travelled across Europe in his “Emma”, a Mercedes 809 that he had converted himself. Although the landscapes, the climate and the cultures changed from country to country, one thing always remained the same: the problem of going to the toilet and the ecologically correct disposal of one’s own waste.

Sustainability is everyone's job

Living and travelling in a camper van is still one of my greatest passions. I just wanted to be self-sufficient and completely free, to explore foreign cultures and at the same time reduce the environmental impact as much as possible. Thus, I had to find a simple and practical solution to the question of an eco-friendly toilet – and that's how the first TROBOLO® prototypes were created in 2010, made from recycled scrap wood at a campsite in the south of France.

Friedrich Lange, Founder and CEO

Certified for a cause

- Highest standards along the entire value chain.
- Fair and social manufacturing methods.
- Ecological origin of raw materials: Without exception from FSC® -certified forests, i.e. forests managed in an exemplary manner.
- All plastics used are 100% recyclable.

The mark of
responsible forestry

How does a TROBOLO® function?

A TROBOLO® does not require any water or sewerage connection. Thanks to the separating and optional exhaust system, it is completely odourless. A TROBOLO® can be emptied quickly and easily and the resulting waste is even compostable.

Each individual TROBOLO® user automatically contributes to the conservation of resources by avoiding black water, drastically reducing water consumption and by composting, thus closing the nutrient cycle.

Composting toilet

- **Independent:** No sewerage connection needed.
- **Chemical free:** The decomposition of urine and faeces occurs naturally and is not prevented by environmentally harmful additives.
- **Environmentally friendly disposal:** Practical in normal household waste. Faeces can be composted properly, and urine diluted with water, to be used as fertilizer.
- **Odourless:** Separation of urine and faeces minimises odours, exhaust system or litter prevent them completely.
- **Hygienic:** Same as conventional toilets.

Chemical toilet

- **Dependence:** Emptying at specialised disposal facilities only.
- **Environment:** Chemicals used are detrimental to both health and environment.
- **Cleaning:** Requires regular deep cleaning.
- **Costs:** Chemical additives are comparatively expensive.
- **Water:** Although chemical toilets do not need a water connection, they do not function completely without water compared to other alternative toilet systems.

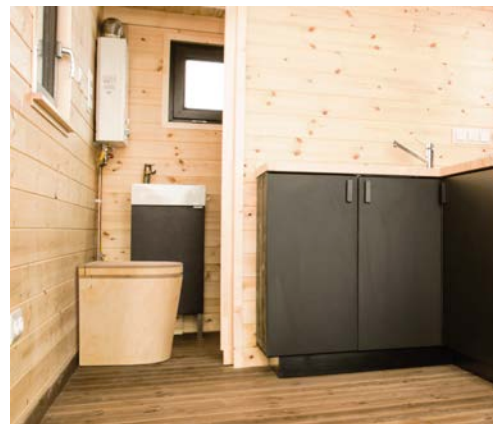

A variety of use cases

A TROBOLO® is perfect for use in all those places without water or access to a sewage system.

Garden

House & Tiny House

Motorhome & Vans

Public

TROBOLO® KersaBøem

Prefabricated kit for outdoor use as a complete solution

TROBOLO® KitaBøem

Prefabricated kit for outdoor use incl. separate toilet for children.

Internet reviews

11ie.de

11ie.de/trockentrenntoilette-von-trobolo/

"We are delighted with our TROBOLO[®]. We can reduce a large part of our water consumption, avoid black water altogether and have the possibility to close the nutrient cycle to a large extent".

maxgreen.info

maxgreen.info/tiny-house-living/trenntoilette/

"We are totally happy & satisfied with our latest addition to the Tiny House, our mobile separation toilet TROBOLO[®] IndiBløem. Environmentally friendly, water-saving, without the use of unnecessary chemicals and bathroom cleaners."

Gartenbob.de

www.gartenbob.de/die-trenntoilette-von-trobolo/

"Whether it is an allotment garden, weekend property, fishing lodge or a house with a garden, a TROBOLO[®] urine-diverting toilet is the ideal solution that requires considerably less litter".

Busbastler.de

busbastler.de

"An easy solution for your camper. The mixture of high-quality materials, well thought-out and simple design convinced us. Now we are even more self-sufficient and independent of chemicals, disposal stations or public toilets".

Customer reviews on trusted shops

Sven K., Dresden

"From the first contact to the finished house, everything went perfectly. Our next toilet - then for the interior - will also be from TROBOLO® again."

Christian U., Hamburg

"The products are amazing! If I had known that a urine-diverting toilet works so perfectly, I would have become a TROBOLO® customer sooner".

Manuela B., Berlin

"Super nice customer service! We had questions and were called back immediately. The product is simply great. Good workmanship, chic look."

Thomas E., Rottenburg

"Consulting, delivery and quality are top. This is ecology in action."

TROBOLO® downloads
